AFTER CONTROL OF THE CENTURY

An Offer of \$1 a Share Was Promptly Turned Down.

SPUR WILL BE BUILT TO GRAND CENTRAL.

A N offer of \$1 a share for the control of the Century Gold Mining company's stock was promptly and emphatically turned down on Thursday. A well known mining operator and a member of the stock exchange started out a week or two ago to land the control for an eastern crowd at the price stated, and after rounding up a number of small holdings he went to Manager Madsen and asked for a short time option on enough stock to make up at least 76,000 shares, or 1,000 more than half of the capitalization. With the market quotations around 30c, he had an idea that he would have no trouble in getting the big holders to join him in getting a sale, but he reckoned entirely without his host. He was advised that the control was not for sale -that his offer could not and would not be considered for a moment.

The next morning Manager Madsen left for the mine, and the would-be pur-chaser wired his clients that the mine could not be touched at the price of-

PRODUCTION AND DIVIDENDS.

The Record For the Month Has Been a Gratifying One.

The month of June draws to a close with the mining industry in a most healthy and promising condition. The dividends paid and ordered paid since the first amount to \$249,000, while the output of the mines, as reflected in the ore and bullion settlements made, reach the handsome figure of \$1,956,500, without counting the Utah Consolidated and the Bingham Consolidated, whose earnings, could they be given, would send the total well over the \$2,000,000 mark.

During June the Consolidated Mer-cur, the Sunshine, the Annie Laurie, the Johnny, the Century, the Sacra-mento and the Dipper have all made splendid showings under the head of gold properties. The Consolidated Mercur has opened what seems destined to prove the largest body of oxidized gold ore in virgin ground ever found in the company's mines. The Annie Laurie, of Gold mountain, for which an eastern crowd is now sparring, has been developing a new chute of ore described as the biggest thing yet discovered in that wonderful mine, while the Sun-shine and Sacramento, both in the Mercur district, have each recorded dis-closures that greatly add to their value. The former's mill is doing magnificent work, while the new plant of the lat-

ter is ready to go into commisson.

Contracts for the new combination
mill at the Johnny of Stateline were awarded early in the week, and ground has been broken for the buildings that will cover the machinery. It is to be completed in ninety days.

At the Dipper property, near the mouth of Little Cottonwood canyon, some splendid gold ore is now being taken out and sacked for market, while reports from the Century are also very Among the silver-lead producers Daly-

West has easily led the van, with the Silver King playing a close second in the value of its product. The Ontario and Daly-Judge also held up to their usual high standard, while the mines of Stockton, Bingham, Tintic and Little Cottonwood aided materially in swelling the month's production. The new plant of the American

Smelting company went into regular commission on Monday, and reports from the United States company's big smelter at Bingham Junction indicate its completon by the end of Septem The stock market has been dull, but the mines have never been as productive as they are right now, and their possibilites for the future were never as bright. The balance of the year will be a hummer in mining, milling and smelting circles in Utah.

SPUR TO GRAND CENTRAL

Railroad Company Will Build It to

Handle Low-grade Ores. hauls ore from the Mammoth mine to the railway at Robinson, is to be extended to the Grand Central mine as soon as the wor kean be done, to wishes to have answered is covered enable that mining company to de-liver to the Bingham Copper & Gold company's smelter 175 tons a day of its low-grade ores. President Holbrook of the Grand Central and an Oregon Short Line official were on the ground Friday looking over the situation and arranging for a right of way. The distance to be covered is but about 2,000 feet from the ore bins of the Mammoth to those of the Grand Central, and has long since been surveyed. but the course runs around a rugged ridge of limestone, nearly every foot of which will require the skill of the miner and the power of the giant powder to build a roadway.

It has been stated in certain quar-

ters that Manager McIntyre of the Mammoth might object to the exten-sion being built, as the route lies across a portion of the Mammoth company's Quno claim, but when asked about it yesterday, Mr. McIntyre said he had no thought of laying a straw in the way of the building of the spur. "The extension of the road to the Grand Central cannot possibly injure me," said he, "and I shall not object

There is not less than 70,000 tons of There is not less than 70,000 tons of low-grade ore on the Grand Central dump awaiting transportation, which means a revenue of \$105,000 to the Short Line and about \$20,000 to the New East Tintic, for its transportation. But this dump is not by any means the extent of the low-grade, nor yet the big end of it. In the mine yet the big end of it. In the mine, from the 400-foot level to the 1,000-foot level, are immense bodies of it, estimated at several hundreds of thousands of tons.

not given out by either buyer or seller. Lead but it is believed that it will net the \$4.121/2. Grand Central close to \$5 a ton, or nearly \$900 per day, which means the early resumption of dividends after a cessation of more than two years. The mine has been practically ex-cluded from the shipping lists during the past year because of the injunction which forbids work in the big stope of rich ore, to which the Mammoth

ANTHRACITE COAL STRIKE.

ning company seeks title under the

Four-foot Vein of It Uncovered Southwest of Ephraim.

law of apex.

Ephraim, June 28.—A former Ephraim man has discovered a four-foot vein of fine anthracite coal southwest of here. The samples shown, which

where they have spent a number of dated shows little change, with clos-days with other parties, looking over ing sales at 18c. where they have spent a number of days with other parties, looking over the Golden Ridge mining property, while there they visited nearly all the principal properties of the camp. They speak very favorably of the district. They brought back some very fine looking quartz from the Golden Ridge property, and also from the Mountain terday at 30c bid. property, and also from the Mountain Queen. A number of local people are interested in both of these properties, and they are well pleased with the

GODIVA WILL CLOSE. HONERINE BUYS TUNNEL SITE Management Decided to Wait For

Better Market For Its Ores. Eureka, June 28.-It has been definitely decided to close down the Godiva mine on July 1, and the property will probably not be re-opened for some time to come. Superintendent J. P. McChrystal has been negotiating with the American Smelting & Refining company for some time for reduced treatment charges on the immense volume of low-grade ore which the mine contains, but was unable to reach a lowing record of final quotations and would have ceased operations some time ago but for the desire to consult the wishes of John Q. Packard, who

was absent in Japan.
Mr. McChrystal says the mine contains probably 150,000 tons of ore, carrying 10 to 12 per cent lead, fifteen ounces silver and about \$1 in gold, which is an ideal fluxing product, but that the company doesn't feel inclined to give it all to the smelters. After the first proximo, Mr. McChrystal will devote his entire time to the Eagle & Blue Bell, and promises a new record for that old Tintic favorite, whose ow-grade ores are now to be marketed under favorable terms with the Consolidated Bingham Copper & Gold Mining company, which has found in the siliceous ores of that property a splendid flux for the sulphide ores.
The incline shaft in the Eagle & Blue Bell has been pushed down 600 feet on the foot-wall of the vein, and at that point stoping and drifting is being done on a body of ore containing copper, gold and silver of an excellent shipping grade, measuring fifteen feet

MONTANA'S MINERAL PRODUCT Report For Last Year Just Made

Shows Heavy Decrease, Helena, Mont., June 28.-The report of S. B. H. Tatem, assayer in charge of the United States assay office at Helena, to the director of the mint for the ena, to the director of the mint for the year 1901, just issued, shows that the value of the gold, silver, copper and lead produced in Montana that year was \$60,387,619.01. Of that amount \$4,802,-717.39 was in gold, \$18,334.442.26 silver, \$33,751,837.34 in copper, and \$498,622.02 in

As compared with the production of 1890, the decrease is about \$3,000,000, due to the lessened production of copper. The report shows that since the discovery of gold in Montana forty years ago, more than \$1,000,000,000 has been taken from the streams and mountains

Little change in the value of the gold produced, as compared with the pre-vious year, is shown, and attention is value of the enlarged use of the cyaniding process during the year. There was also little change in the value of the silver produced. In the table showing the production by counties, Lewis and Clark lead in the value of the gold. and Clark lead in the value of the gold

Granite leads in the value of silver, with \$2,353,304.49. Silver Bow in copper, with 227,742,262 fine pounds. Meagher leads in the producton of lead, with 2,-500,000 fine pounds.

TUNNEL SITE PURCHASED.

Honerine Company Gets the Doremus Ranch in Tooele Valley.

Yesterday the Honerine Mining com-pany, through Manager Snyder, pur-chased A. F. Doremus' 960-acre ranch start the long drain tunnel that is des-fined to tap and relieve the mines of Stockton district of water. The pur-chase price was not given out, but it is thought to have been in the neighborhood of \$10,000.

Manager Snyder says the 7,000-foot tunnel will be commenced Tuesday morning, as will also the breaking of ground for the intermedate shaft. The int selected for the latter tunnel level will be reached in 200 feet, and then driving will be prosecuted from three points. Pipe lines will be laid and ower supplied from the present works of the Honerine company

Outline of Mining Law.

A. R. Derge & Co. of this city have published a most valuable little vol-ume entitled "Outline of Mining Law," edited by Charles B. Jack of the Utah The New East Tintic railway, which volume is intended only as a digest ume is commended without reserve. Something of the kind has been needed, and the publication should find a good sale. Its cost is 50 cents.

Data For Tonopah Exchange.

Kenneth J. Donnellan, formerly of this city, who is working like a beaver to get the new stock exchange at Tonopah started off right, is in almost daily correspondence with Secretary Shorten of the local exchange, from whom he is gathering all sorts of data respecting rules, bookkeeping system, forms of contracts, etc. Yesterday a letter from him asked for an outline of the quotation board, and the sec-retary mailed him a fine photograph, showing the board, the handsome features of the caller and a pit full of members. The photo will no doubt find a place on the walls of Tonopah's new exchange building.

Ore and Bullion,

Ore and bullion settlements in this city during the past week amounted to \$424,500, yesterday's proportion of that sum being \$47,400, reported by McCor-nick & Co., as follows: Silver, lead, gold and copper ores, \$38,900; base bullion, \$6,600; gold bars, \$1,900. base

Metal Market.

Silver, 52%c per ounce. Copper, 11%c per pound; New York, 11.85@12c. Lead, \$3.50 per 100 pounds; New York,

THE WEEK ON 'CHANGE.

Activity in Daly-West Made Business Look Better Than It Was.

The week on the mining exchange losed with the sale of 12,600 shares of stock, for \$6,850.50, while for the six days the totals were 154,457 shares, and \$118,017.85. The rapid rise and unusual activity in Daly-West account for not less than one-half of the money involved in the trading, so that business on the whole was much lighter than luring the previous dull week.

Daly-West was selling at \$44 to \$44.50 on Monday, while yesterday it sold at \$48. Consolidated Mercur has sold at \$48. Consolidated Mercur has been held firmly at close to the \$2 mark all week, while Carisa has fallen off about 2c a share, to 25%c. Ajax pany's offices. He says developments shows little change, at 33%c asked, and

in the absence of sellers, it closed yesterday at 30c bid.

Ben Butler, with a 1c assessment tacked on, and with most flattering reports on conditions at the mine, has moved up from 9½c to 10½c, and during the day or two preceding the close, it was quite active at 10c and better.

Yankee Consolidated, that opened the Yankee Consolidated, that opened the week around \$1.23, has gradually receded, and closed on an offering at \$1.144, with \$1.12 bid.

The announcement of a dividend by Utah has sent that stock up several cents a share. It was not to be had yesterday for less than 53c, while earlier in the week it sold at the control of the stock it sold at the stock is sold at the stock in the week it sold at the stock is sold at the stock in the week it sold at the stock is sold at the stock in the week it sold at the stock in the week it sold at the stock in the s lier in the week it sold at 48c.

Daly-Judge sold on the open board during the week at \$7 and \$6.75, but the

amount responding to these figures has not been large.

Gave the Major a Gentle Roast,

Manila, June 28.-At today's session of the province of Tayabas, against American officers and soldiers, Major Gardener continued his testimony, the first part of which was presented yesterday. The recorder objected to extraneous

evidence, and said the witness was not entitled to special privileges. Counsel for Major Gardener admitted that the point was well taken, but said he thought the grave question involved called for more than ordinary inquiry. The recorder replied that it was a matter of routine and that the record showed that Major Gardener had al-ways been given every advantage. He had long felt and he believed this feel-ing was that of the rest of the board, that regardless of whatever they did, Major Gardener would accuse the board of unfairness. For this reason the board had given the major every privilege. His privilege to throw mud was certainly not granted to soldiers and officers, and so the major was en-

deavoring to besmerch them. The major had been represented at the hearing as governor of Tayabas by the chief supervisor, the fiscal's assistant, the attorney general and his first assistant. The recorder did not profess to be a lawyer. He thought, however, that such an array of talent was not likely to be imposed upon.

PRESIDENT TAKES A HAND.

May Fight Anthracite Mine Operators as Violators of Anti-trust Act.

New York, June 28 .- President Roosevelt has requested Attorney General Knox to submit an opinion, says a Washington dispatch to the World, as to whether the combination controlling the anthracite coal output constitutes a trust within the meaning of the Sher-man anti-trust act and the decision of the United States supreme court there-

In making his request, the president gave Attorney General Knox the re-port recently prepared by Carroll D. Wright, commissioner of labor, after a careful investigation of the differences existing between the coal operators and the miners, the facts forwarded by President Mitchell of the United Mine Workers' association and all other data in his possession bearing on the sub-

It will be the duty of Attorney General Knox to formulate an opinion for the president, making a definite declaration that the anthracite combination does or does not constitute a trust. His present instructions do not require him to go further and express an opinion as to the probability of successful pros-ecution under the Sherman anti-trust

The president will, it is believed, determine on his subsequent line of ag-tion after Attorney General Knox has rendered his opinion.

TO DECIDE SMITH'S FATE.

his review of the proceedings of the court-martial, and the papers are now in the hands of Secretary Root, who is so busy with other matters that he has not yet had time to give the case the attention it deserves. It has been generally understood that General Smith was acquitted by the court, but it transpired today that such was not the case, the court, it is alleged, having found General Smith guilty of violating the rules of war and sentenced him to be reprimanded by the reviewing au-thority, which, in this case, is Presi-dent Roosevelt. Inasmuch as the case is considered strictly confidential until finally acted upon by the president, it is impossible to obtain any official information in regard to it.

LOOKS BAD FOR PACKERS.

Supreme Court of Missouri Decides Against Alleged Beef Combine.

Jefferson City, Mo., June 28.—The su-preme court today sustained the motion of Attorney General Crow to strike out the returns of the packers in the ouster proceedings, as to all the contention except the sixth, which raises th questions whether the packers are in combine to fix and maintain prices On this point the court overruled the motion and appointed I. H. Kinley of Kansas City to take testimony and report on the first day of the October term of the supreme court.

Attorney Hagerman, for the packers filed exceptions and objections to the action of the court on the ground that the points overruled involved federal questions, which the supreme court of the United States should pass upon. The court sustained the constitution ality of the state anti-trust laws in volved in the motion. Chief Justic Burgess and Justice Marshall dissented from the action of the court in overruling a part of the motion relating to the question of fact on which testimony is

Recorder of Philippine Board Republicans Vote to Declare Seat Vacant-Two, Appropriation Bills Not Yet Settled.

Washington, June 28.-When the house of the board, which is inquiring into the charges of cruelty, etc., brought by Major Cornelius Gardener, governor of the province Gardener, governor adjourned tonight the general deficiency bill and one item in the naval appropriation bill were all that remained in dispute between the two houses so far as the appropriation bills are concerned. The conference report on the District of Columbia bill was adopted and it now goes to the president for his signature. Earlier in the day the house decided the contested election case of Horton vs. Butler, from the Twelfth Missouri district, by declaring the seat vacant. By a vote of 135 to 100-a strict party vote—Mr. Butler, who is a Democrat, was decided not entitled to the seat, Mr. Butler made a vigorous speech of an hour in defense of his right to the seat.

Bills were passed to extend for one year the time in which to make final proof on desert, land entries on the Yaqui desert reservation, Washington; to authorize the secretary of war to receive Arturo R. Calvo of Costa Rica as a cade at West Point; to prevent any consular officer of the United States from accepting an office of trust from a foreign country without executing ample bond with the secretary of the treasury, and for the relief of settlers on lands granted in aid of the construction of wagon roads.

At 6.06 the house adjourned until 11 o'clock tomorrow.

Summer Acne, Tetter Eczema Salt Rheum Terrors Psoriasis Nettle Rash

An itching, burning skin disease during the hot, sultry summer weather, is a positive terror and a veritable demon of discomfort. The intolerable itching and stinging are tantalizing almost beyond endurance, and the unsightly eruption and rough, red skin keep one thoroughly uncomfortable and miserable night and day. Eczema, Tetter, and diseases of this type are caused by acid poisons in the blood, which the heat of summer seems to warm into life and renewed activity. These fiery acids keep the blood in a riotous and sour condition, and the skin unhealthy and feverish-they inflame the pores and retard perspiration, when the whole body feels like an over-heated furnace, and the escaping poison burns and blisters like liquid fire.

TORMENTING ECZEMA.

KANSAS CITY, Mo., May, 1898.

Station A, Kansas City, Mo.

To the skin disease sufferer, summer time brings no joy, In 1896 I experienced at times but is a season of unrest, sleep-night, was simply terrible; it would almost specialists, and used several external applications, one of which was claimapplications, one of which was claimed to be a certain specific. I confess, however, I had but little faith in external applications, yet I used them, receiving but slight temporary relief. In February I decided to try S. S. S. and in less than a month I experienced a change for the better and by May application of Lotions and far to be cured, and they could do nothing a change for the better, and by May of that year all symptoms had disappeared, and I found myself entirely cured, and have had no return of the disease since.

W. P. Brush. nothing applied externally can

rash or eruption. The itching, especially at itched and burned, causing much discomfort. As time went by it grew worse. I had read medicine in my resulting in shattered nerves, early twenties (now 50 years of age) physical exhaustion and general resulting in shattered nerves, physical exhaustion and general resulting in shattered nerves. early twenties (now 50 years of age)
and was convinced that I was afflicted
with a type of Eczema. I consulted
several physicians and a number of
vital forces. Scratching is a

DEAR SIRS-My body broke out with a

MRS. L. B. JACKSON, 837 St. Paul St., Kansas City, Kan. alter the condition of the blood or check the outflow of the burning fluids through the skin. Only persistent and faithful constitutional treatment can do this. The acid poison in the blood, which is the real cause of the eruption, must be attacked, and when the blood has been cleared of all accumulated impurities and restored to a healthy condition, then, and only then, will a thorough and lasting cure be effected, and for the accomplishment of all this, no remedy equals S. S. S., which contains all requirements for cleansing and building up the acid blood, and invigorating and toning up the system. S. S. S. completely and permanently eradicates every vestige of poison, thus effectually preventing a fresh outbreak of the disease.

Cases that have resisted ordinary treatment for years, yield to the purifying, cooling effects of S. S. S. upon the blood, and when rich, pure blood is again circulating through the system, the itching and stinging cease, the eruption disappears, and the red, rough skin

becomes soft and smooth again. Skin diseases appear in various forms—sometimes in pustules or blisters, sores, rashes, or red, disfiguring bumps and pimples-but all are caused by a bad condition of the blood, and for which S. S. S. is a safe and effectual cure. No bad effects can come from its use, because it contains no Arsenic, Potash or other harmful

drugs, but is guaranteed a strictly vegetable remedy. If you are a sufferer from some summer terror like Eczema, Tetter, Acne, Psoriasis, Salt Rheum, Nettle Rash or kindred disease, write us about it, and medical advice or any special information wanted will be given without charge.

Our Book on Skin Diseases will be sent free to all desiring it. THE SWIFT SPECIFIC COMPANY, ATLANTA, GA.
